PO Box 1450
Alexandria, VA 22313-1450

REPLY BRIEF

It is respectfully argued that a prima facie case of obviousness has not been presented due to the reasons set forth in the appeal brief. In addition, the combination of the references would not result in the claimed invention. Combining England and Okada as suggested by the examiner would result in hiding the execution of curtailed code (based on England) in a system that includes a processor that additionally has a function

42390P13736

PATENT

to prevent the illegal execution of a program (based on Okada). The combination would not result in a processor that decodes and executes a launch instruction, wherein the execution of the launch instruction meets the requirements of the claims of the prevent application.

Therefore, each of the final rejections should be reversed and the claims subject to this Appeal should be allowed to issue. Please charge any necessary fees, including extension fees, to our Deposit Account No. 50-0221.

Respectfully submitted,

Date: September 13, 2010
